HEATSAIL PRESS RELEASE JANUARY 2026

CELEBRATING MORE THAN DECADE OF INNOVATION

Heatsail is a Belgian design company that has redefined the luxury lighting, heating and cooling arena.

Extending the ultimate outdoor experience for the hospitality and residential markets is one of our specialties. We create unique long lasting experiences because our products not only extend the finest moments of a beautiful day, but are also long lasting design objects that treasure those best moments. For more than a decade, we have been blending elegance and functionality into timeless design objects that are both stylish and sustainable.

Our iconic collections bring warmth and ambiance to any outdoor space.

At Heatsail, we stand for more than just aesthetics; we create solutions that promote a sustainable lifestyle without compromising on comfort. Be inspired by the refinement and craftsmanship of Heatsail and discover how our designs can elevate your outdoor living to the next level.

FAR-infrared technology

We use comfortable FAR-infrared heating which is most easily absorbed by people's skin. Your face is almost never covered so the perfect skin exposure for FAR-infrared rays. This is why Heatsail has designed outdoor heaters you can install above a table or lounge set so these rays have easy access to your body effectively.

Design you can feel.

HEATSAIL PRESS RELEASE JANUARY 2026

DOME MUD & TERRA

Two new colours, celebrating a decade of warmth & light.

In 2026, Heatsail marks a decade of transforming outdoor spaces into places where evenings last longer and moments linger. To honour this milestone, we present a special anniversary offer for the DOME — the very first Heatsail creation, the piece that started it all. When it launched, the DOME redefined outdoor comfort. Its elegant, sheltering shape brought together heat and light in a single architectural gesture. It became a landmark in terraces, gardens and hospitality venues worldwide — a warm canopy under which people gathered, talked, laughed and stayed.

The DOME is not just a product; it is a symbol of connection. For this anniversary year, two limited-edition colours reinterpret its story: Mud brings the DOME back to its origins. Inspired by earth and clay, its soft mineral tone blends naturally into outdoor environments.

Warm, grounded and timeless, Mud reflects the simplicity of being together outside — where real moments are made.

Terra adds depth and architectural character. A warm brown hue gently referencing the Corten trend, Terra carries the emotion of terracotta enriched with the sophistication of weathered steel. It feels contemporary yet organic, glowing beautifully under the DOME's light.

Together, Mud and Terra celebrate everything the DOME has represented for a decade: **warmth, light, design and togetherness.** These colours — and the special Dome anniversary offer — are available only in 2026.

A decade deserves something unforgettable.

Together, Mud and Terra celebrate everything the DOME has represented for a decade: **warmth, light, design and togetherness.**

NEW TWIG Light

HEATSAIL TWIG LIGHT LAUNCH 2026

In 2026, Heatsail opens a new chapter in outdoor living with the launch of a new lighting category, starting with TWIG Light. Designed for outdoor use, The TWIG brings clarity and atmosphere to moments that matter — from quiet reading to relaxed evenings or shared outdoor cooking experiences.

TWIG is designed for flexibility and effortless portability. Twig adapts seamlessly to events and hospitality projects where atmosphere and mobility matter.

With a single touch, The TWIG shifts seamlessly between warm and cool LED light, allowing users to adapt the ambiance to the moment. Subtle and elegant in form, it blends naturally into terraces, gardens,

and rooftops, whether used on its own or alongside other Heatsail family products.

True to Heatsail's design philosophy, TWIG Light is built for longevity and ease of use. Its lighting element is uniquely easy to replace and can be used with or without a rechargeable battery pack, connected effortlessly via USB-C. Flexible, durable, and thoughtfully engineered, it invites people to stay outside just a little longer.

When the temperature is right — or paired with Heatsail's heating solutions — TWIG Light helps create new, long-lasting outdoor moments.
