

Antwerp Design Week - May 30-June 3, 2026 - Pakhuis Sint- Felix, Oudeleeuwenrui 29, 2000 Antwerpen, Belgium

The exhibition

From May 30 to June 3, 2026 Fedustria presents both the **Fedustria Hub** and **Best of Belgium**, inviting visitors to immerse themselves in the richness and diversity of contemporary Belgian design.

The Fedustria Hub brings together a curated selection of Belgian brands — **Paul Rogers, PR Living, Dauby, Theuns, Atelier Nilsen, Jori and Bazar Bizar** — within a dedicated space where each brand expresses its unique identity. Visitors are invited to explore distinct universes, discover materials and craftsmanship, and engage with the stories and vision behind each collection. The Hub creates a dynamic environment where design meets dialogue, offering an authentic insight into Belgium's creative landscape.

BEST OF BELGIUM

Complementing this experience, **Best of Belgium** is a curated design platform showcasing more than **20 iconic Belgian products** on a single, striking catwalk. Developed by Fedustria, this exhibition highlights the creativity, craftsmanship, and diversity of Belgian furniture and object design. Each piece is carefully selected to represent excellence in design, from established icons to emerging talents. Presented in a refined, gallery-like setting, the installation emphasizes the quality of materials, attention to detail, and the stories behind each brand. Through integrated QR codes, visitors can further explore the people, processes, and vision that define Belgian design today, seamlessly connecting the physical and digital experience.

Iconic venue Both concepts are set within the remarkable Felixpakhuis, a historic 19th-century warehouse that once served as a vital hub for the storage and trade of goods arriving through the port of Antwerp. Originally built in 1858, the building played a key role in the city's economic development. Today, it has been carefully restored into a vibrant cultural and creative destination, where its industrial heritage — characterized by cast-iron columns, brick vaults, and impressive volumes — provides a unique and inspiring backdrop for contemporary design.
