

Press Release – Antwerp Design Week

Discover Linio – timeless elegance in solid oak

During Antwerp Design Week, we proudly present our newest collection, Linio – a furniture line that effortlessly brings together craftsmanship, refinement, and character.

The collection includes a range of solid oak cabinets, from sideboards to storage and display cabinets. Each piece is defined by subtle routed wave patterns in the doors, rounded corners that create a soft and inviting look, and an elegant base where the lines of the bottom flow seamlessly into the finely crafted legs. These thoughtful details give Linio its unique and harmonious signature.

In addition to the cabinets, Linio also introduces a collection of solid oak tables. The tabletops are available in various shapes – rectangular, triangular, and Danish oval – and can be fully customized in terms of size, finish, and style preference. Customers can also choose from a variety of edge finishes and two distinctive types of table legs.

The collection is available as standard in four warm, timeless colors, while offering extensive customization options to perfectly match any interior.

Belgian craftsmanship and customization

At Made By Theuns, each piece of furniture is fully designed and produced in Belgium. As specialists in working with solid oak, we combine traditional craftsmanship with contemporary design. Our expertise allows us not only to deliver high-quality collection pieces, but also to create unique bespoke projects tailored entirely to the wishes of our clients and professionals.
