pre-laminated boards
for furniture & interiors

APPLICATIONS

*minimalist lamps,
chandeliers,
illuminated furniture,
wall coverings,
partitions,
splashbacks,
tiles,
railings,
installations*

VALUE PROPOSITION

Authentic nature inside - real plants preserved in design

Sustainable sourcing - local plants, upcycled ragweed, zero-waste production

Customizable - materials and objects tailored to projects

Biophilic design - reconnecting people with nature indoors

Storytelling - every piece reflects the origin of its plants

WHO WE WORK WITH

We partner with **interior designers, architects, distributors, and agents** who want to create unique, sustainable, and story-driven spaces.

We also collaborate with **premium showrooms and product makers** looking to elevate their collections with nature-inspired solutions.

VIAPLANT MATERIALS

01 CAST, 02 TEXTILE, 03 VILES, 04 GLASS, 05 BOARD

02 TEXTILE

CHARACTERISTICS - extremely light, bendable, translucent, natural material

APPLICATION

Thanks to its flexibility and translucency, this material is ideal for use as lampshades. It can also be applied as wallpaper, even on curved surfaces. Additionally, it is suitable for screens in roomdividers, partition walls, and decorative elements. Extra elastic layers can be added to enhance the material's strength and durability

04 GLASS

CHARACTERISTICS glass surface with glossy finish, vivid colours, glass adds certain depth effect to the material

APPLICATION

Wall coverings, railings, shower cabins and screens, design radiator front panel, furniture, windows and door glass surface

03 VILES

CHARACTERISTICS - extremely light, bendable, translucent, natural material, waterproof properties, resistance to UV radiation, low-temperature toughness, stress-crack resistance

APPLICATION

Framed Wallpaper, fixed size wallpaper / mural, wall coverings: even at curved surfaces. Screens of room dividers, partition walls, decoration. Both one- and two-sided applications

01 CAST

CHARACTERISTICS - durable surface, matte or glossy, 3d depth, unique design

APPLICATION

illuminatted wall, wall coverings: wall tiles partition wall, kitchen splashback, decoration, custom products

05 BOARD

CHARACTERISTICS - cabinet doors, drawer fronts, table tops, room dividers, decorative surfaces

APPLICATION

Additional (varnish, foils) surface treatments can be applied to further increase durability and shine. General edging techniques can be used to seal sawn edges. Solid wood edging or edge banding is recommended. Can be customized for existing/custom wooden elements, e.g. for furniture, including wear surfaces.
